

KIDNEY SHIELD™

FOR PEOPLE

The most powerful supplement for revitalization and kidney support

***Rich in pure Omega-3 fatty acids,
SOOTHES IRRITATED KIDNEYS AND MAINTAINS
THEIR HEALTH AT THE CELLULAR LEVEL!***

Omega-3 fatty acids are essential for our body and especially for preserving, promoting and maintaining kidney health at the cellular level. They can nutritionally support healthier inflammation and immune responses throughout the body.

Without an adequate supply of them, the organs, especially the kidneys, struggle to maintain health and keep the body in harmony.

In fact, the kidneys are one of the fattest organs in the body and absorb Omega-3 fatty acids like a dry sponge placed in water..

NOURISHING, PURIFYING AND SUPPORTING THE KIDNEYS!

Today, the modern Western nutrition is deficient in beneficial fatty acids. And since the body doesn't naturally produce Omega-3s on its own, they need to be obtained from dietary sources.

The most potent form of Omega-3 comes from fish from the deepest oceans.

Kidney Shield™ sources its Omega-3s only from toxin-free wild fish, molecularly distilled (i.e. the most effective purification process) to ensure that there are NO MICROSCOPIC TOXINS IN THE PRODUCT!

The Omega-3 fatty acids in Kidney Shield™ are the most potent and purest you can find in any supplement, because they come from fresh, wild-caught fish.

The PATENTED FORMULATION of Kidney Shield™ contains high amounts of the two essential Omega-3s, EPA (eicosapentaenoic acid) and DHA (docosahexaenoic acid).

When these two essential fatty acids reach certain levels, as in Kidney Shield™, they provide the critical nutrients for optimal kidney support.

2 Kidney Shield™ softgels contain a whopping 1,500 mg, in a balanced ratio of 800 mg EPA and 600 mg DHA, plus 100 mg other Omega-3 fatty acids. Exactly what kidneys love.
